

## Tool List (Corner Brook Campus): Esthetics and Spa Management with Electrolysis

The profession of esthetics is one of the fastest growing personal service industries. The esthetics professional trains and provides personal services in many areas including skin care, nutrition, aromatherapy, pedicures and body sugaring which help clients of all ages look and feel good about themselves. It is a highly personal service and an exciting, rewarding career because of the variety of services given to clients during a typical day. Estheticians provide clients with an opportunity to enhance their total physical and emotional care that is so important in today's high stress society. Being skilled in the latest spa treatments including spa customer services and sales, is important for today's industry professional.

Students are required to purchase the items on the attached supply lists.
