

Materials List: Medical Device Reprocessing

Medical Device Reprocessing Technicians are important members of the health care team. A Medical Device Reprocessing Technician is a medical professional who cleans, disinfects, sterilizes, prepares, and distributes instruments/equipment including endoscopes in a hospital or medical lab.

Students are required to purchase the following items:

- Scrubs (top and bottom) - 2 sets
- Closed-toe footwear (Sneakers recommended) – 1 pair

NOTES

1. **Further purchases may be required, please verify with your instructor.**
2. Textbooks also have to be purchased before courses begin.
3. **Students should meet with their instructors prior to making any purchases including used textbooks.**
4. Suggested suppliers:

Walmart

Mark's Work Wearhouse

IMPORTANT: *Items must be purchased by the first week of laboratory classes.* Students must follow proper protocol when entering the lab.
